

Epic Online Technology Meeting Mini/Micro LEDs

Forming Micro-LEDs with Micro Transfer Printing Technology

March 25th 2021

Alexandre Chikhaoui

X-Celeprint Ltd, Company Introduction

- **Who we are:** Technology Development company focused on advanced micro assembly
- **Core Technology:** Micro Transfer Printing
- **What We do:** Adapt Micro Transfer Printing Technology to customer specific applications
- **Business Model:** Licensing
- **Some Key markets:** Photonics, Power Management, Automotive, Medical, Authentication

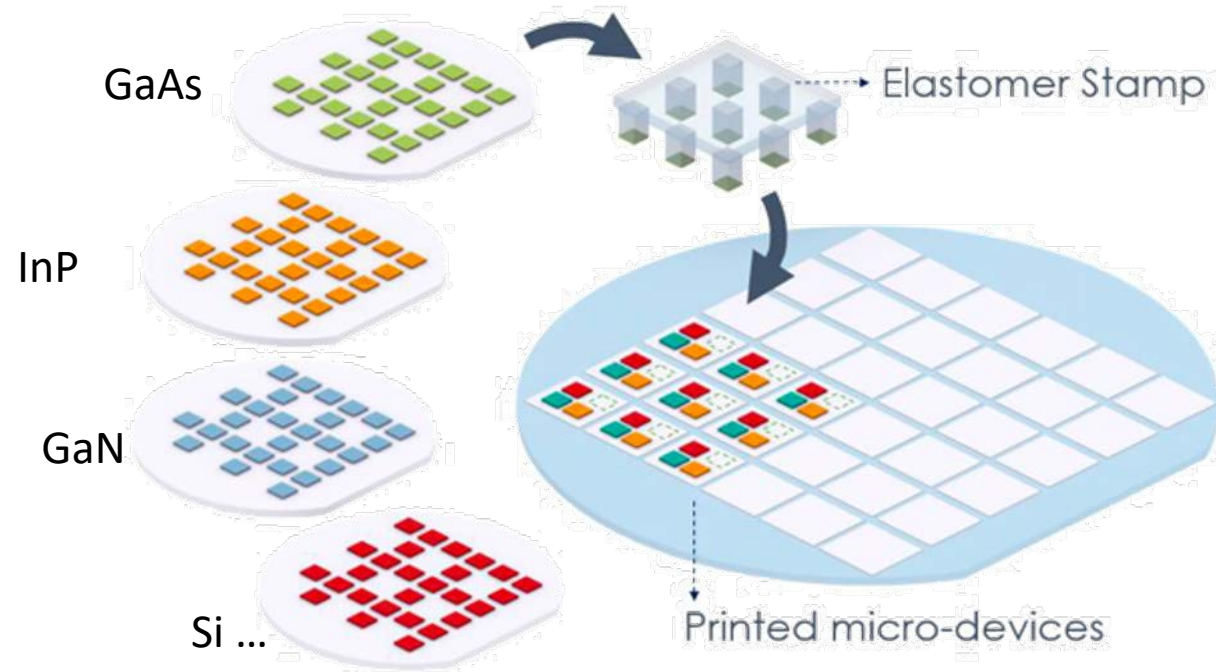

- End of 2019
X-Display was spunout
from X-Celeprint

- Product and Licensing Company
- Focused on Display applications

MTP Technology – Enabling True 3D-Heterogeneous Integration (3DHI)

Densely packed Chips from different source wafers are transferred to the destination target and then interconnected

MTP enables True 3D Heterogeneous Integration

Production Printer “MTP 200A”

From Mini to Micro LEDs

Gan on Silicon Micro LED Process Flow Example

Horizontal 3 x 10 μm^2 GaN On Silicon μLEDs fully released and floating onto the Silicon Substrate -> Print Ready !

Gan on Sapphire Micro LED

Flip Chip GaN/Sapphire Micro LED
(Bottom P/N Pads)
Interconnected at print

PSS - GaN/Sapphire Micro LED
(Top P/N Pads)
with Thin Film Interconnect

Array of BBB μ LEDs
Interconnected at Print

Micro LED Mass Transfer by MTP

- MTP Processes have been developed for numerous form-factors and types of micro-LEDs
 - Gan on Silicon (Green and Blue)
 - Gan on Sapphire (Green and Blue)
 - GaAs (Red)
 - Lateral and vertical
 - Top Pad and Flip Chip
 - 3x10um; 8x15um; 30x60um ...

True 3DHI Opens Unlimited Possibilities for Next Generation High End Displays

70x35 μm^2 RGB package

XDC's PixelEngine™ Component
6 LEDs printed on an IC that has been
printed to an interconnecting backplane

LED Driver + RGB package

5.1", 70ppi, 73% transparency

5.1" 360x180 display

Pictures are courtesy from X-Display™

Multiple Applications Beyond Displays

Display

Micro LEDs
+ LED driver

Medical

Micro LEDs Sensors
Micro LED Driver

Automotive

Micro LEDs LED Driver
I/F + Micro Controller

Authentication

Micro LEDs Power
Controller + Memory

3DHI Micro SYSTEMS by MTP

MTP Adoption and Ecosystem is Growing

- MTP prototyping at R&D lines:

- First MTP-ready foundry service:  FAB CMOS 0,18um SOI (XT018)

- MTP manufacturing systems available now from multiple manufacturers

- MTP licensees for microLEDs growing*

OSRAM Lextar
