

ADVANCED ELECTRONIC MICROSYSTEMS

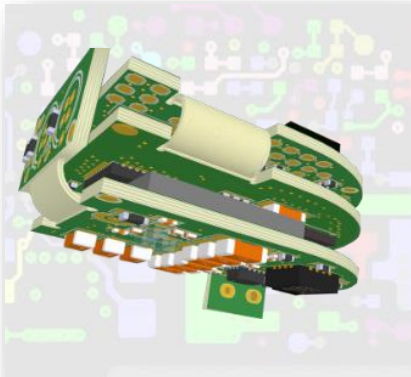

Excellence in (opto) electronics and sensor systems offering high-end chip level technology services from product / process development to packaging

**PRODUCT & PROCESS
DEVELOPMENT**

**VOLUME
PRODUCTION**

**SUPPLY CHAIN
MANAGEMENT**

Areas of Excellence

✓ **AEMtec at a
glance**

VALUE CHAIN

Concept

(Rapid)
prototyping

Supply chain
management

Test systems /
qualification

Industrialization/
Volume production

Product lifecycle
support

System concept and joint development of specifications based on end-user demands

Fast, multi-stage prototyping on series equipment for faster ramp-up and time to market

Supply chain design, synchronization and management according to customer requirements

Design and development of test systems as well as product qualification through accelerated lifetime testing

Volume production with industry-leading technologies

Longtime storage of components supplemented by repair and maintenance services

WHERE WE CREATE VALUE

- ✓ Medical / Bio Tech
- ✓ Industry and Automation
- ✓ Semiconductors
- ✓ Data and Telecommunication
- ✓ Aerospace and Transportation

STATE-OF-THE-ART FACILITY WITH UNIQUE SET OF HIGH TECH EQUIPMENT

✓ **Your strategic partner for customized advanced electronic packaging**
