

PHIX Photonics Assembly

Large scale assembly and packaging foundry for Photonic Integrated Circuits (PICs)

As an independent pure play packaging facility, founded in 2017, we supply PIC and MEMS based components and modules in scalable production volumes.

Jeroen Duis
Chief Commercial Officer

Supporting all PIC platforms

Silicon photonics, silicon nitride, indium phosphide, planar lightwave circuit, and many more.

From prototype to volume

We help optimize your PIC design and module BOM for smooth scale-up to large manufacturing volumes.

World leading expertise

We're specialized in hybrid PIC assembly, fiber attachment, and (ultra-high frequency) electronics interfacing.
