Membership
Benefits

www.epic-assoc.com

Make it EPIC!

Be part of the world leading photonics industry association.

There are many benefits of becoming a member of EPIC, such as having a dedicated organization supporting the development and competitiveness of the photonics industry and its members.

However, there is much more! All members are always encouraged to take active participation in EPIC's vibrant network and take full advantage of the membership benefits.

Networking & socialization possibilities

Members have access to all our technical events as well as our more informal events like runs, breakfasts and other social gatherings to broaden and strengthen the network.

International networking

Members have preferential access to EPIC's international network and our established relations with International associations. We also organize delegations to help explore new territories.

Free access to online meetings

We organize a lot of free online meetings each year where members get a chance to learn, interact and hear about the latest in photonics.

Connecting with potential business partners

By strengthening the connections among our members we create a forum to meet, discuss challenges and opportunities and explore collaboration possibilities.

Access to end-user markets

We have partnerships and Memorandum of Understanding (MoU) with many industry associations to help build potential collaborations and partnerships with key players of each specific industry.

Free access to market reports

All members have free access to technology presentations & market reports on our extranet.

Free promotion & visibility

We offer a wide range of services free of charge to create more visibility such as online product releases, interviews, banners on our website, media visibility and newsletters.

Personal outreach & knowledge

We visit our members in person on a regular basis to learn more about your company and how to connect you with the right partners. The EPIC team is always available to share their extensive knowledge on any topic you might have.

Investment knowledge & support

We have actively worked on the creation of a Photonics investment fund and this network is available to our members.

Workgroups for HR, Marketing & Sustainability

EPIC has dedicated workgroups where we organize training sessions and members get a forum where they can gather and share their knowledge, experience and best practices.
